

## “TORGOTERM” PLC

### ENVIROMENTAL PROTECTION POLICY

Torgoterm" PLC has set as a main purpose the continuously improving of the work concerning the protection of the environment, maintaining and development of the integrated Environmental Management System (EMAS) in conformity with the requirements of БДС EN ISO 14001:2005 when applying the respectful legislative and regulatory requirements

This policy is aimed at the development of all activities, processes, products and services in an acceptable for the environment way subject to the following guidelines:

- Achieving a conformity with the legislative requirements for environmental protection regarding activities, processes, products and services of the organization and their aspects;
- Economical consumption of the environmental and other resources.
- Reduce to a minimum or, if it is possible, pollution prevention of the environment by adopting general and specific objectives and programs
- Application of the best available techniques when this is possible and economically viable;
- Striving for reuse and recycling of generated waste and their proper utilization and disposal;
- Surveillance and measurement of key characteristics of processes and activities which has significant impact over the environmental protection..
- Active cooperation with the authorized organizations for environmental control and all interested parties when resolving problems concerning the protection of the environment.

The management of “Torgoterm” PLC calls the associates to apply the principles and requirements under this environmental policy and proceed from them when setting specific goals.

The application of these principles and the personal responsibility for environmental protection, as the compliance with the requirements resulting from the integrated Environmental Management System are on all associates responsibility

All suppliers and clients of the organization are urged to comply with the declared in policy commitments of the management regarding the environment.
